

## Nolos Acquires Skylegal

I am pleased to announce that...

Nolos acquires Skylegal techno juridique inc. and Skylegal services juridiques inc., two LegalTechs from Quebec.

This acquisition, an important step in our accelerated growth and strategic plan, will allow us to integrate our technology platforms and consolidate our comprehensive and unique value proposition. Now that Skylegal's 40,000 clients are joining the Nolos family, we are looking forward to empowering each one of them to protect their families and loved ones.

I am grateful to everyone who have worked hard and contributed with conviction into making this transaction possible. Nolos is privileged to be able to count on the expertise and experience of the co-founders of Skylegal, Me Alexandre Roy and Mr. Remi Bergeron, who will occupy key strategic positions within Nolos to contribute to its vision.

Nothing changes for Skylegal's 40,000 customers. In addition to the products they already use, they will have access to personalized offers, expert financial and legal advice, as well as a full range of benefits and services enabling them to take control of their lives and legacies. Fundamentally, Nolos is a purpose and social driven entity motivated by the desire to democratize and raise financial and legal services to the level of a common good.

We acknowledge that social, legal, and financial inequities are omnipresent in our society and that these manifest themselves in our families and into our communities. Looking into the statistics while bearing witness to such discrepancies, we feel called upon to act! While education remains the permanent solution for present and future generations; we must bet on fundamental principles such as awakening, access, initiation, and action to have a real impact on families and their communities today.

Join us on our journey to change the statistics while giving life to Nolos' social expression!
